

FLEXI-BAC

ADVANCED HEAVY DUTY BACTERICIDAL CLEANER CONCENTRATE

FLEXI-BAC is a heavy duty bactericidal cleaning product that is technically advanced and safe to use on any surface that will tolerate water. Because of its advanced bactericidal properties, it is an extremely useful product in the Food Processing Industries where an effective heavy-duty cleaning solution is required.

FLEXI-BAC may be used on interior walls and floors, worktops, oven tops, painted surfaces, tiles, etc. to remove fats, oil, grime, nicotine, carbon, ink, dyes, creosote, and most stubborn soiling in kitchens, restaurants, garages, factories, etc.

The versatility of FLEXI-BAC is such that it may even be used as a pressure washer additive for cleaning both interiors and exteriors of delivery vans. Hence, it has the potential to replace several different cleaning products, thus avoiding confusion and providing storage economy.

FLEXI-BAC is suitable for use by most cleaning techniques - mopping, scrubbing, spraying and pressure washing. It is very economical as it can be diluted with up to 60 parts water, depending on the severity of the application. When used as a power wash additive, dilution rate can be up to 100:1, hot or cold.

STORAGE AND HANDLING:

Keep tightly closed in original containers. Keep away from sunlight and extreme temperatures.

Alkalinity pH 12.0

IRRITANT

COSHH Data: A safety data sheet (MSDS) providing additional information is available on request.

Packaging Sizes:

4 x 5 litre jerrycans

25 litre drums

210 litre barrels

BENEFITS:

- Heavy duty cleaning
- Use on any surface that will tolerate water
- Powerful advanced formulation
- Effectively shifts fat, grease and grime
- Environmentally acceptable
- Water-based
- Cleans machinery, walls, floors, painted surfaces, etc
- Ideal for janitorial, industrial, catering and institutional use
- Caustic-free
- Able to replace several products
- Versatile
