

SAND SOAP

Heavy Duty, Solvent-Free, Hand Cleansing Paste

SAND SOAP, for heavy duty applications, is a natural hand cleaner that is non-alkaline and solvent-free. It thus eliminates the potential skin problems liable to be experienced by those who are hypersensitive to the solvents used in heavy duty hand cleaning gels.

Lack of solvents in SAND SOAP allows for better perfuming, so its lemon fragrance makes it more pleasant to use, leaving no unpleasant paraffinic smells on the hands to mar the enjoyment of food at break times.

SAND SOAP is biodegradable, so is preferred from an environmental point of view as well. The "sand" has, of course, been replaced by a modern plastic granulate which will not clog drains.

SAND SOAP cleans deep into the pores without irritating the skin. It creates a rich lather and rinses freely.

SAND SOAP is in the form of an off-white pumpable paste and is easily dispensed, if required. Please ask about these inexpensive dispensers.

The product is thoroughly viable in use.

SAND SOAP removes grease, oil, and general grime quickly and easily without damaging the skin. A small amount should be rubbed into the hands and water added. Wash vigorously, then rinse, and dry thoroughly.

COSHH Data: An EC safety data sheet (MSDS) providing additional information is available on request.

Packaging Sizes:

- 15 litre tub
- 4 x 5 litre tins
- 4 x 5 litre plastic tubs

Dispensers

A range of suitable dispensers is available. Please ask.

Area of Application:

For removing heavy duty contaminants such as mineral and lubricating oils, graphite, metallic dust, tar, bitumen and carbon black.

- Powerful cleansing action
- Cleans without irritation
- Exceptionally kind to the skin
- Biodegradable
- Alkaline-free
- Solvent-free
- Lemon fragrance
- Imparts a pleasant feel to the skin
- Thoroughly economical and thus viable
- Does not clog drains
- Does not pollute
- Easily shifts heavy duty contaminants
- Suitable for use in a wide range of production processes
